A CRM APPLICATION FOR THECHAIShop&Co

Project Documentation

1. INTRODUCTION

1.1 Project Overview

The project titled **"A CRM Application for TheChaiShop&Co"** focuses on designing and implementing a Salesforce-based Customer Relationship Management (CRM) system to efficiently manage customer, employer, and enterprise data. The application automates sales calculations, organizes customer interactions, and provides insightful reports and dashboards to support business decisions.

The CRM system replaces manual record keeping with a centralized, cloud-based solution that improves accuracy, productivity, and customer engagement.

1.2 Purpose of the Project

The purpose of this project is to:

- Streamline customer and employer data management
- Automate order quantity and billing calculations
- Reduce manual errors in sales processing
- Enable real-time reporting and dashboards
- Improve customer engagement through automated email notifications

2. IDEATION PHASE

2.1 Problem Statement

User	Trying to Do	Problem	Reason	Feeling
Sales Representative	Manage orders & billing	Incorrect calculations	Manual process	Stressed
Store Manager	Monitor sales	Delayed reports	Data scattered	Confused
Customer	Receive offers	No timely updates	No automation	Undervalued

2.2 Empathy Map Canvas

Target Users

- Sales Representatives
- Managers
- System Administrators

Aspect	Description
Think & Feel	Need accurate data
Hear	Feedback from management
See	Multiple registers
Say & Do	Manual data entry
Pain	Errors and delays
Gain	Automation and reports

2.3 Brainstorming

Considered Solutions

- Manual system
- Excel-based system
- Web-based CRM
- **Salesforce-based CRM (Selected)**

Reason for Selection:
Salesforce provides automation, scalability, security, and built-in analytics.

3. REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

1. User Login
2. Access CRM Application
3. Enter Customer Data

4. Generate Orders
5. Automated Billing
6. View Reports
7. Decision Making

3.2 Solution Requirements

Functional Requirements

FR No	Description
FR-1	User Login
FR-2	Custom Object Creation
FR-3	Data Entry
FR-4	Automated Billing
FR-5	Reports & Dashboards
FR-6	Email Automation

Non-Functional Requirements

- Usability
- Security
- Reliability
- Performance
- Availability
- Scalability

3.3 Data Flow Diagram

User → Salesforce UI → Custom Objects → Validation Rules → Flows → Reports → Dashboards

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

The CRM system automates data handling, eliminates manual billing errors, and enables real-time reporting. It ensures faster operations and better customer interaction.

4.2 Proposed Solution

Key features implemented:

- Secure login and role-based access
- Customer, Employer, and Enterprise objects
- Record types and page layouts
- Formula fields for billing
- Validation rules
- Automated email alerts
- Reports and dashboards

4.3 Solution Architecture

Architecture Layers

1. Presentation Layer – Salesforce Lightning UI
2. Application Layer – Flows & Automation
3. Data Layer – Custom Objects
4. Analytics Layer – Reports & Dashboards

5. PROJECT PLANNING & SCHEDULING

5.1 Development Approach

- Agile-based development
- Sprint-wise implementation

- Continuous testing and validation

6. PROJECT DEVELOPMENT PHASE

Project Flow (Milestones)

1. Developer Account Creation
2. Object Creation
3. Tabs
4. Lightning App
5. Global Picklists
6. Fields & Relationships
7. Page Layouts
8. Record Types
9. Validation Rules
10. Email Templates
11. Flows
12. Reports & Dashboards
13.

7. FUNCTIONAL & PERFORMANCE TESTING

During this phase, system functionality and performance were tested using the Salesforce Lightning interface.

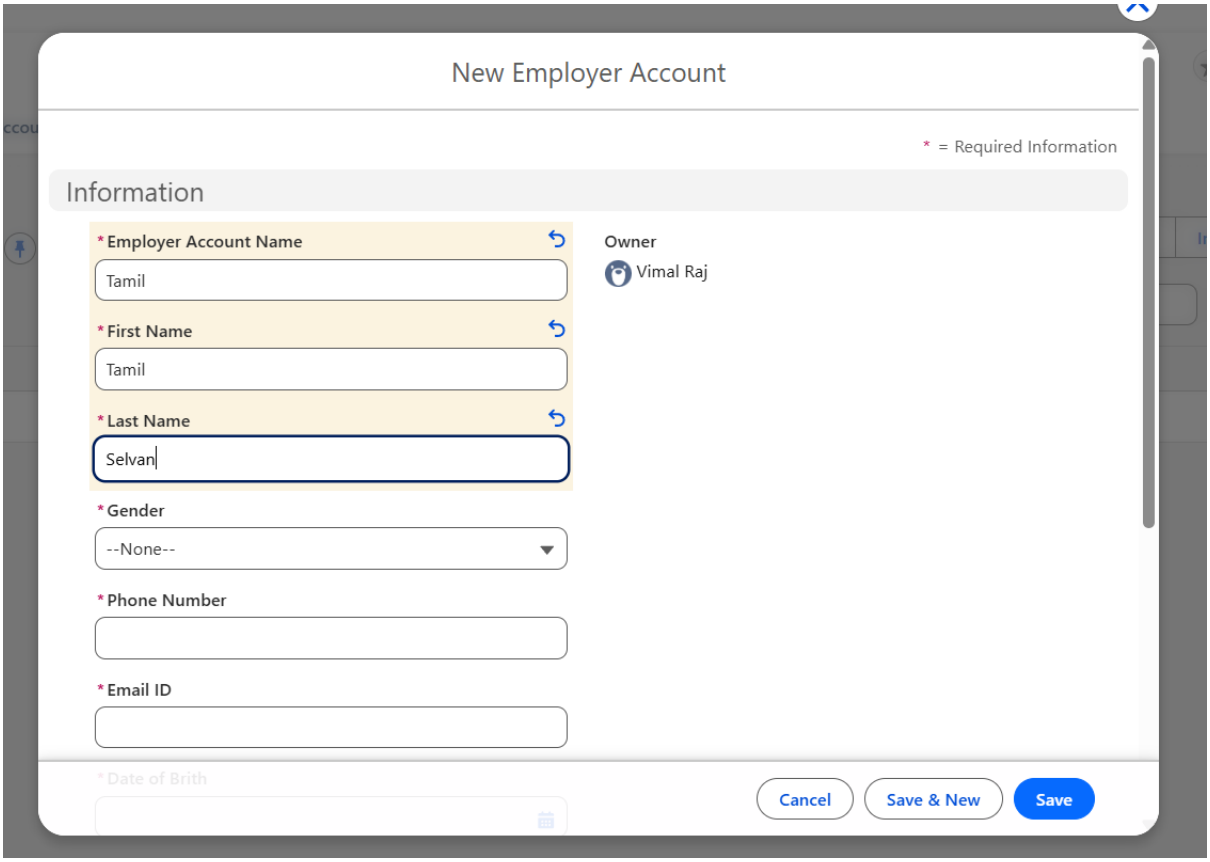
7.1 Functional Testing

The following features were tested successfully:

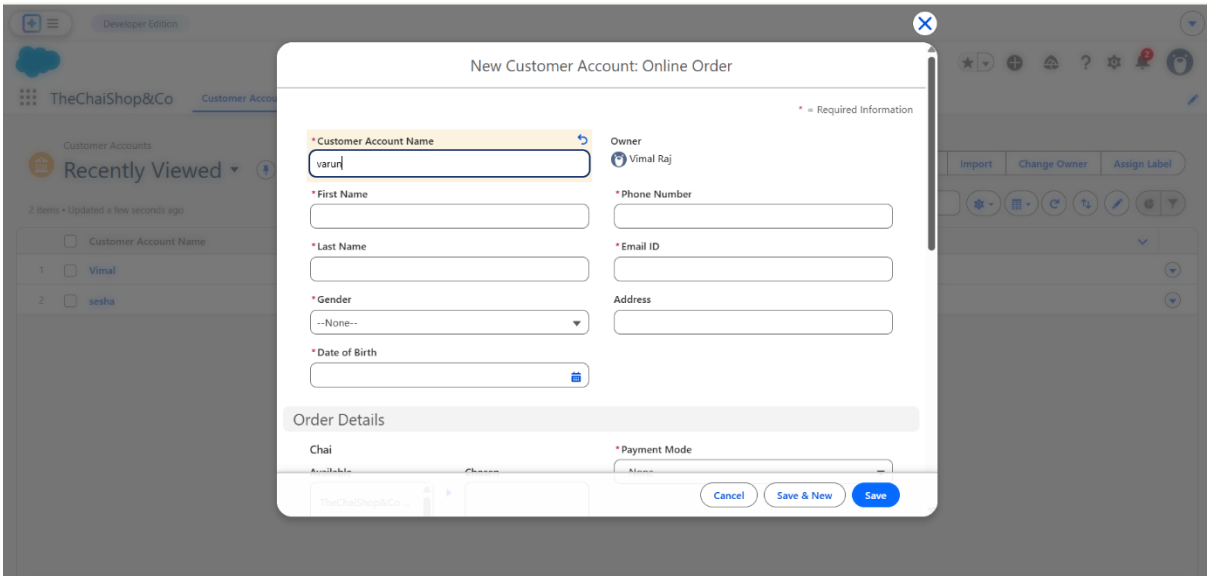
- Creation of Employer, Customer, and Enterprise records
- Validation rules for Aadhaar, PAN, and phone number
- Record type selection and page layout switching
- Automated order quantity calculation
- Automated total bill calculation
- Birthday email flow execution
- Report and dashboard generation

Screenshot Placeholders (Attach here):

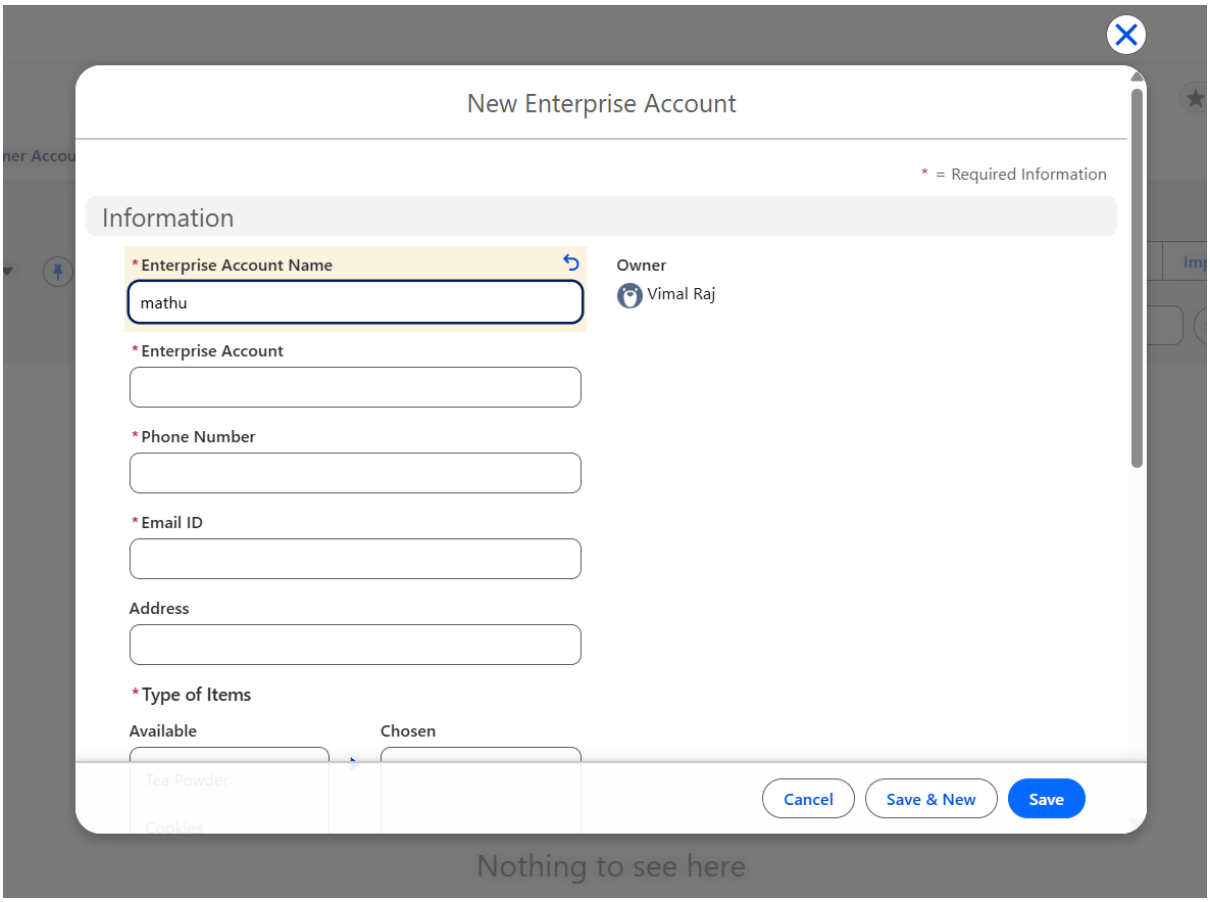
- *Screenshot 1:* Employer Account Record Creation



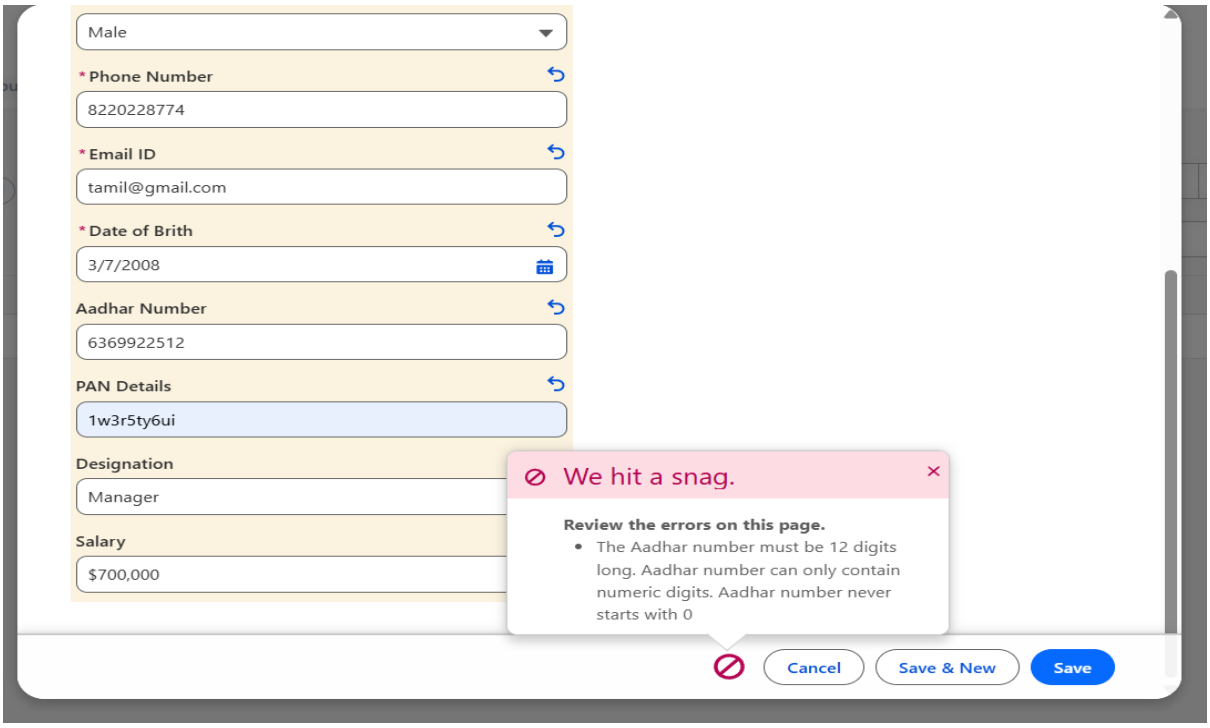
- *Screenshot 2:* Customer Account Record Creation

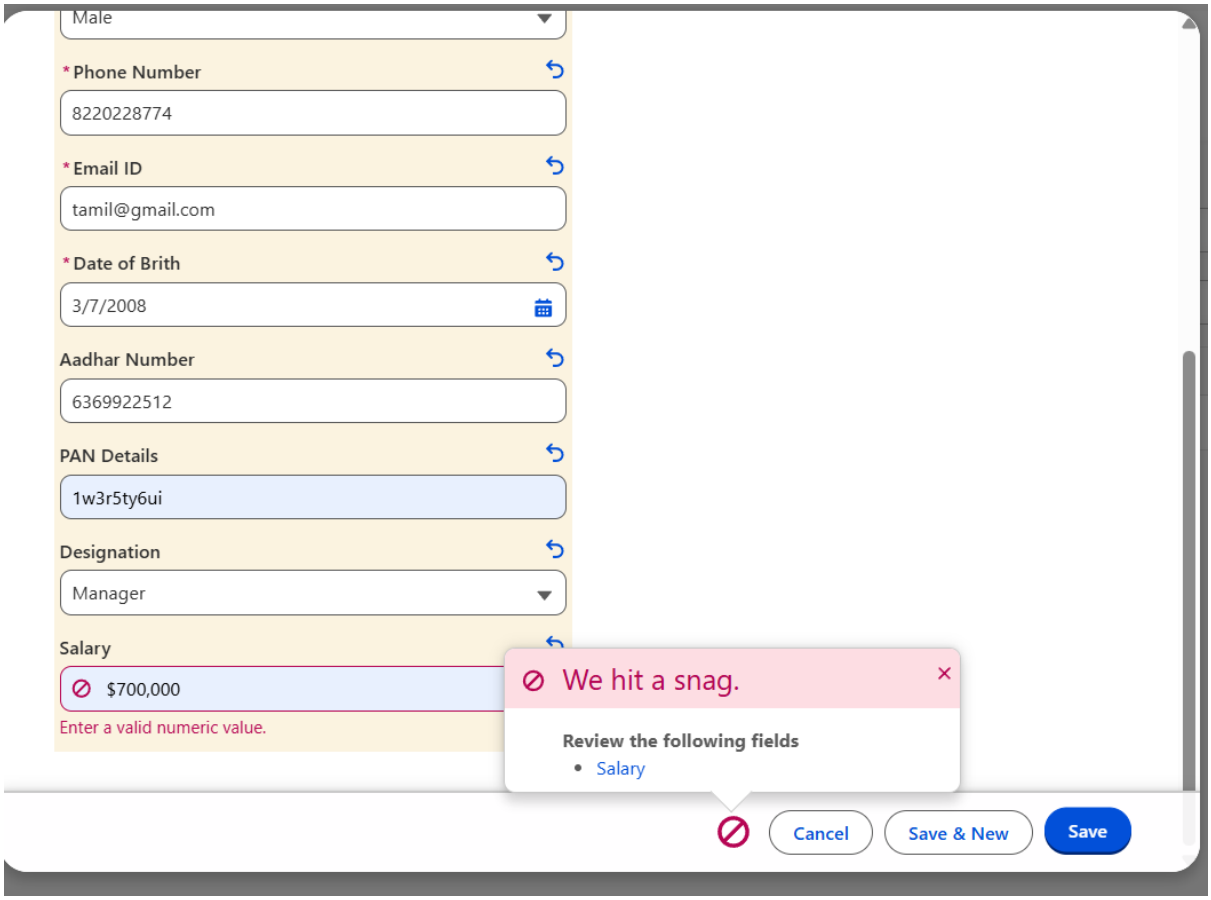


- *Screenshot 3:* Enterprise Account Record Creation

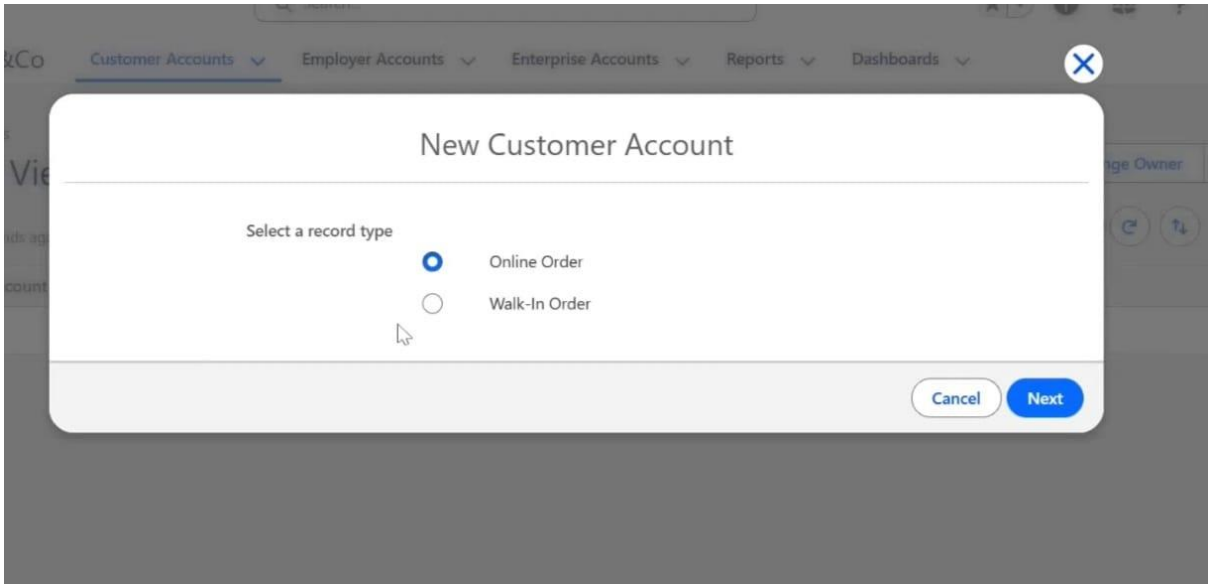


- *Screenshot 4:* Validation Rule Error Message

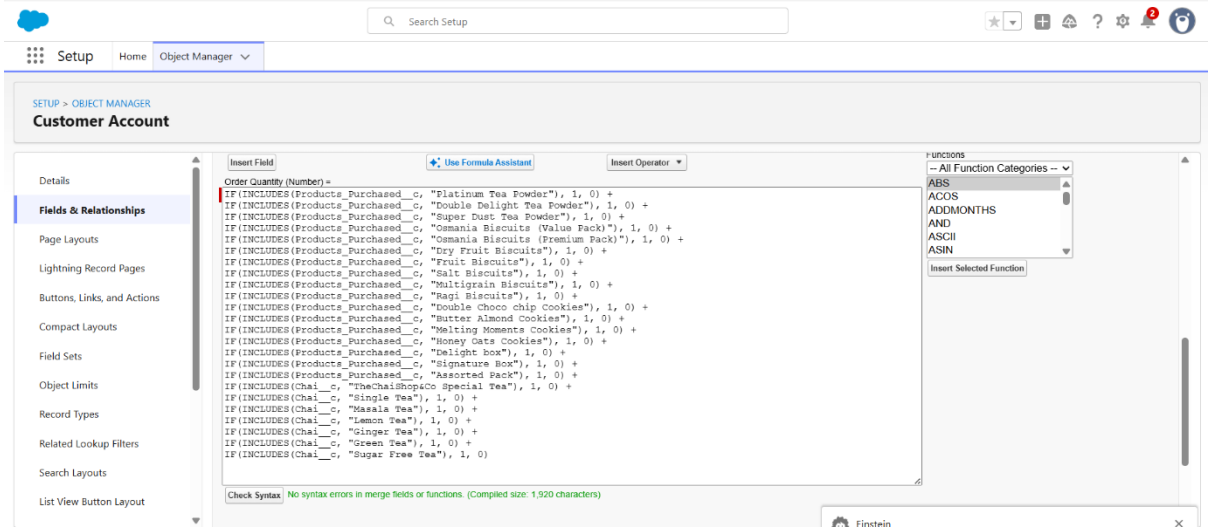


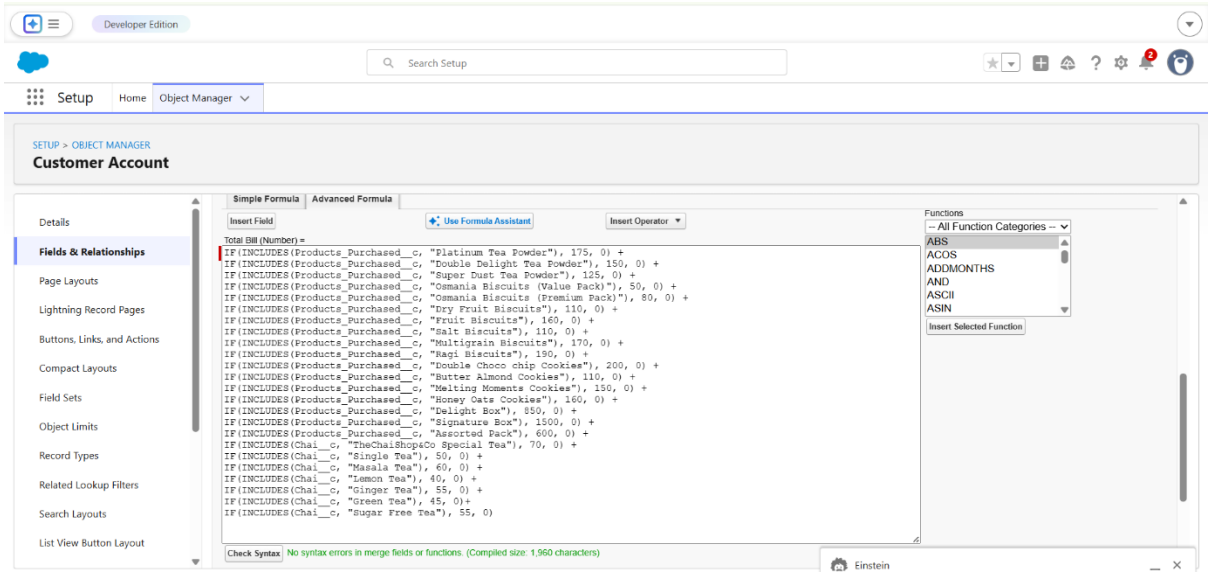


- *Screenshot 5:* Record Type Selection Screen

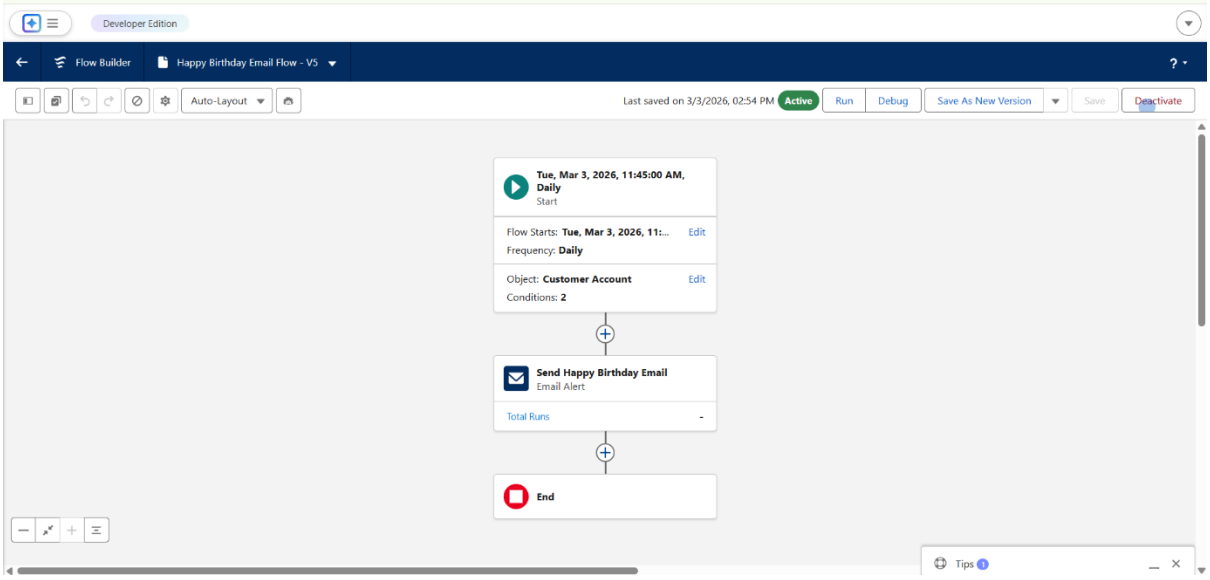


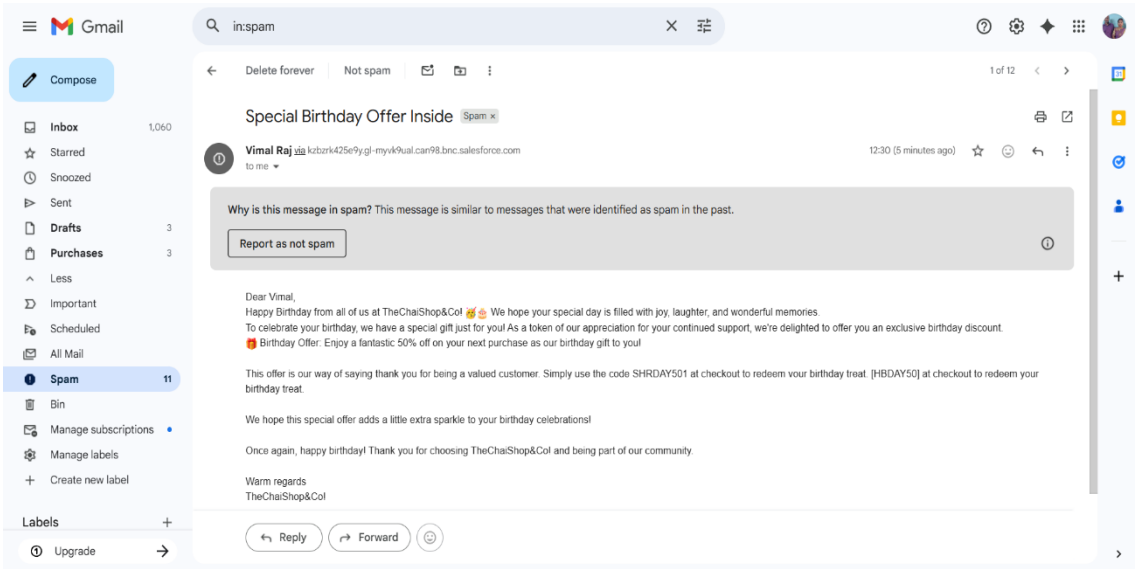
- *Screenshot 6:* Formula Field Calculation (Order Quantity & Total Bill)



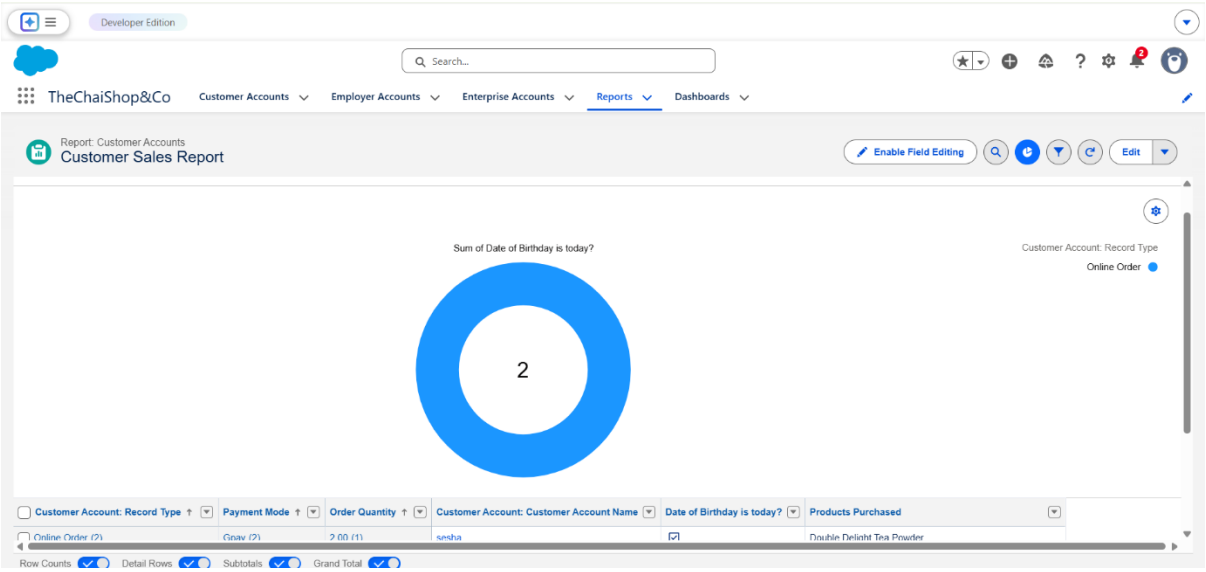


- *Screenshot 7:* Birthday Email Flow Execution

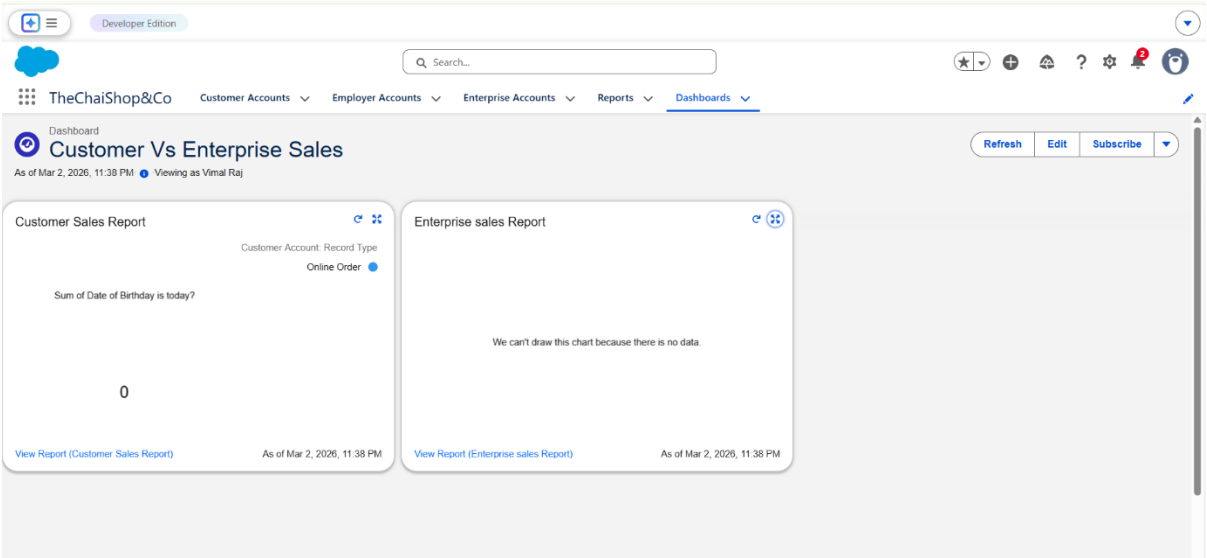




- *Screenshot 8:* Customer Sales Report



- *Screenshot 9:* Dashboard View



7.2 Performance Testing

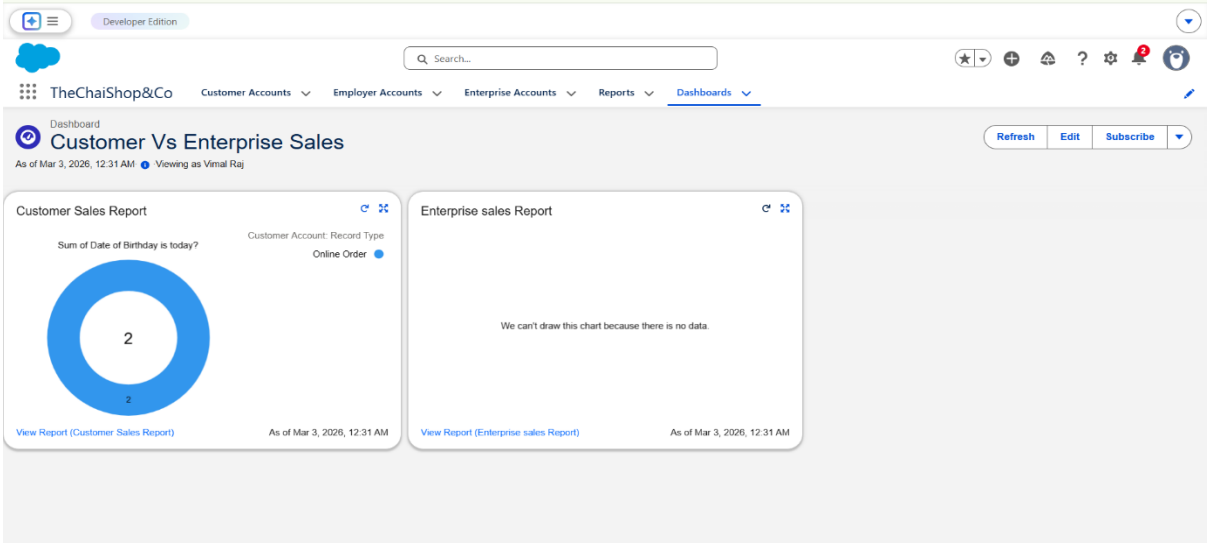
Performance testing verified:

- Fast page loading
- Quick report generation
- Smooth dashboard rendering
- Stable performance under multiple record

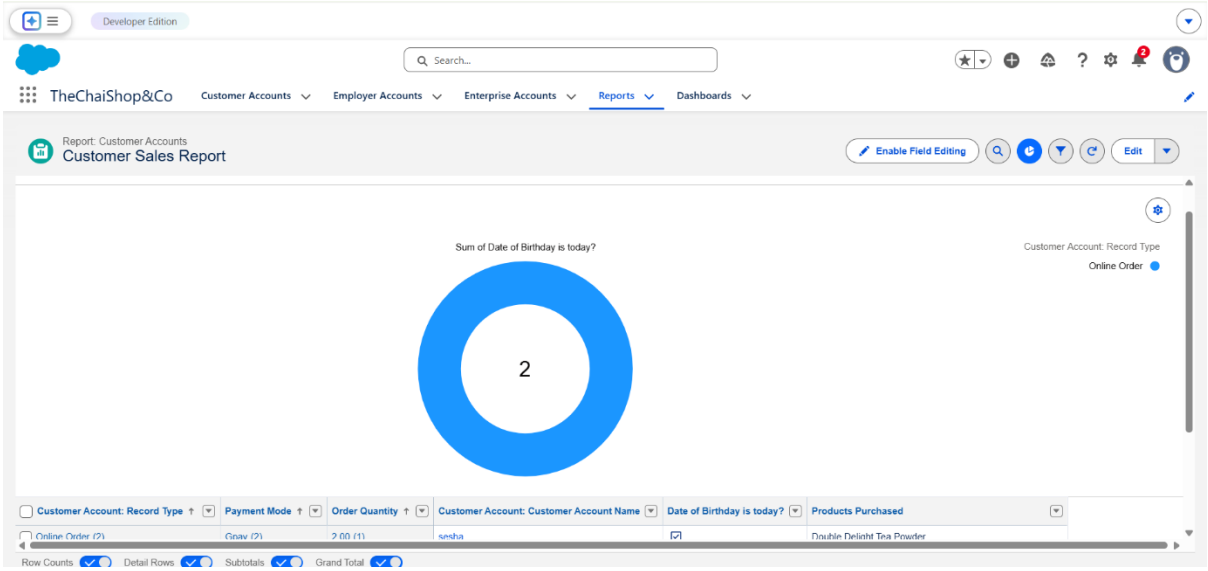
Screenshot Placeholder:

- *Screenshot 10:* Report Load Performance / Dashboard Performance

Dashboard Performance



Report Load Performance



8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized CRM system
- Automated billing
- Reduced errors
- Improved customer engagement
- Real-time analytics

Disadvantages

- Requires Salesforce license
- Internet dependency
- Limited offline access

9. CONCLUSION

The CRM Application for TheChaiShop&Co successfully enhances business operations by automating customer management, billing, and reporting. The system minimizes errors, saves time, and improves customer satisfaction through personalized communication.

10. FUTURE SCOPE

- Mobile CRM integration
- AI-based sales prediction
- SMS/WhatsApp alerts
- Inventory management
- Multi-branch support

11. APPENDIX

- Salesforce Configuration
- Custom Objects & Fields
- Flows and Email Templates
- Reports & Dashboards
